

How-to Guide

- 01 Download the template and print full size on letter paper (A4).
- 02 Use the template as a guide to cut 4 pieces from the fabric of your choosing.
- 03 Align two pieces on top of each other with the external sides facing one another.
- 04 Sew along curved side, attaching side A to side A on seam line (3/8 stitch recommended).
- 05 Clip every half inch around the edge on curved side so it will fold easily when flipped.
- 06 Repeat steps 3-6 (attaching side B to side B) with remaining two pieces.
- 07 Stack the two newly attached pieces with external sides facing each other. Lay flat on one side.
- 08 Sew line C and D (top and bottom) leaving the short edges open.
- 09 Pull it inside out so the closed seams are hidden.
- 10 Fold the open edge (LF/LB to RF/RB) once (1/4 inch) inside the mask to hide raw edge.
- 11 Sew to secure, leaving an opening at the top and bottom to insert an elastic band, shoelace, ribbon or something else to secure mask to face.
- 12 Thread elastic band or other material (10 inches long) through the mask and tie a knot. Pull knot into mask to hide.
